</form>
</body>
</html>

Analysis

```
{
  "risk_level": "High",
  "risk_score": 87,
  "suspicious_indicators": [
    "Reply-To domain mismatch: The email claims to be from PayPal (paypal.com) but the Reply-To address is paypal-help-login.top.",
    "Link mismatch: The visible link text says 'https://paypal.com' but the actual URL is 'https://example.com'.",
    "Credential harvesting form: The email contains a form requesting email and password.",
    "Urgent language: The subject line and body use urgent language ('Urgent: verify your account', 'Account suspended')."
  ],
  "reasons": [
    "The Reply-To address is a strong indicator of phishing, as it directs replies to a domain not associated with PayPal.",
    "The link redirection is a classic phishing technique to deceive users into submitting credentials on a malicious site.",
    "The presence of a credential harvesting form confirms the malicious intent.",
    "The use of urgent language is designed to pressure users into acting without thinking."
  ],
  "recommended_action": "Do not interact with this email. Mark it as phishing and delete it. If you recently entered your credentials on the linked website, immediately change your PayPal password and contact PayPal support."
}
```
